

Science Exhibition-22nd Feb,2011

The amateur scientist of VidyaGyan exhibited the self-made models dealing with different principles of science. The kids displayed scientific models of great utility which brought into mind the sanctity of science on our day to day life. The exhibition also cast light on the significance of the optimum utilization of resources around us and the preservation of the same. It was great to see the students explaining the working of the scientific models to the visitors. They exhibited and explained the working of the Spectroscope, Optical Illusions, Japanese lantern, working of the railway Signal, food testing methods, Vermi-composting, Non-Conventional sources of Energy etc.
